Vx Therapy® Program

What is the Vx Therapy?

Safe, Proven Pain Relief

Vx Therapy, delivered via an in-home virtual reality device, provides a safe and effective treatment for trauma which can include chronic or acute pain, depression, anxiety, sleep issues, and PTSD-related symptoms. Our 3-month in-home program blends biological components with the psychological and social components that often go unaddressed. **Vx Navigator** support provides training on device setup, platform navigation, and product usage as well as troubleshooting assistance and weekly compliance reports.
